# GUARANTEE OF GENUINENESS

Our trees are all budded or grafted as far as possible from bearing trees, and every care and precaution is exercised to have them true to name; still with all our caution mistakes are liable to be made, but we hold ourselves in readiness, on proper proof, to replace all trees and other stock that may prove untrue to label, free of charge, or to refund the amount paid. It is mutually understood and agreed to between purchaser and ourselves, however, that our guarantee of genuineness shall, in no case, make us liable for any greater sum than that originally paid us for said trees, etc., that prove untrue.

---

## REMARKS

In presenting to our patrons our price list for the season 1907-1908, we wish to thank them for past favors, and solicit a continuance of same. We shall endeavor to maintain our reputation for fair dealing, and to give our very best attention to all orders entrusted to us, so that the stock we send out shall reach our patrons in good condition and be satisfactory. Our facilities for shipping are as perfect as possible, and with our improved methods we are enabled to pack and forward orders at short notice.

At our local sales yard, 1225 J street, we will carry a fine line of ornamental plants to meet the demands of our customers who have found it inconvenient to visit our packing grounds.

The limited amount of space in our J street lots will not permit us to display our immense stock to advantage, and our patrons who are desirous of purchasing fruit as well as ornamental trees are strongly advised to visit our extensive grounds on the Southern Pacific Company's railroad reservation on H street, between Amador and Sacramento streets. In order to keep a full line of palms and decorative plants, we have erected a fine greenhouse 20 by 50 feet, and a large lath house, which will be under the charge of a thoroughly competent man. The packing grounds can be easily reached by taking the Forthcamp avenue car. Get off at Sacramento street and go two blocks west.

Our main office is located at 1225 J street, in very commodious quarters and immediately adjoining our former office building. From here we are in telephonic communication with all of our nurseries and departments. We invite correspondence. Our services are always at the disposal of our patrons should they desire any advice on anything pertaining to our line of work.

Our stock of trees for this season is exceptionally fine, both in fruit and ornamental departments; and we are confident that we can please all those who place their orders with us. It is a rule of this establishment to send out no tree or plant which we would hesitate to plant ourselves.

---

## TO INTENDING PURCHASERS

### THINGS TO OBSERVE.

1. All orders should be legibly written on a separate sheet of paper, and not mixed up with the body of the letter.
2. In ordering please state whether substitution will be permitted, as we feel at liberty when no instructions accompany the order to replace with other sorts as nearly similar as possible.

A few words of explanation of the foregoing is, in our opinion,

advisable, for customers on some occasions have made very serious objections to our exercising this privilege when it was really our desire to serve them to the best of our ability. It must be borne in mind that nursery stock must be grown from two to three years in advance, and it is largely a matter of guess-work on our part what varieties will be in demand. Years of experience have taught us to lay down certain defined rules, and of standard commercial sorts of fruit trees our aim is to grow sufficient stock to meet ordinary requirements from year to year. It often happens that a variety of which we grow only a limited quantity is exhausted early in the season, and as it may be impossible to secure it from other nurseries, it is either necessary to cancel the order or substitute with another kind which is similar. In nearly all cases when we exercise our judgment we do not hesitate to say that we believe our customers will approve of our desire to please them.

3. Our packing and labeling are as perfect as possible; and we charge for the same only to cover the cost of material. All goods are delivered at the railway or express office free of charge.

4. State distinctly how you wish us to ship—by freight or express; also designate the route, otherwise we use our own discretion in forwarding.

5. After delivering to the carriers we cannot hold ourselves responsible for any loss or injury to trees or plants after they have been carefully packed and shipped; but we will do everything in our power, if any loss should occur, for the protection and recovery of our customer's property.

6. Orders to be sent by express, C. O. D., will be filled, provided one-half of the amount is sent with the order.

7. If any mistakes are made in filling orders, we will cheerfully rectify the same, but must respectfully request our customers to notify us at once, **or, at the most, within ten days after receipt of the goods.**

8. Orders from unknown correspondents must be accompanied by a remittance or satisfactory reference.

9. We uniformly tie our trees in bunches of 10, and grape vines in bundles of 50; and we suggest to our patrons to make their orders for assortments as far as possible in multiples of these numbers.

10. Articles mentioned in the following list will be furnished at prices named as follows: Five at the 10 rate; 50 at the 100 rate; 500 or more at the 1000 rate. Less than five of a variety at the single rate. This does not mean, as an illustration, that 10 pears, 10 apples, 10 plums, 10 nectarines would be charged at the 100 rate. To secure this rate it will be necessary to order 50 trees of one sort.

#### ARTICLES BY MAIL.

For the convenience of those who cannot be reached by railroad or express, packages of small trees, if in stock, not exceeding four pounds in weight, can be forwarded by mail, such articles to be charged at single rates, postage additional.

#### A NOTE OF WARNING.

Those only who can show proper credentials are authorized to solicit orders for us. We wish to call special attention to this notice, as we know it has heretofore been the practice of unprincipled persons to procure the catalogues of prominent nurseries and take orders in their names, which they fill from poor stock bought elsewhere. If our patrons will notify us of any person whom they have reason to believe is not a regularly appointed agent, we shall consider it a favor.

Please remember to write your name, postoffice, county and state as distinctly as possible; also give your nearest express office and railway station, or if on a stage route, send us special directions, giving us the name of the transportation company delivering the goods. Orders for export to old Mexico, the Hawaiian Islands, Cuba and South American points should give, in addition to the above, the steamship routes by which their orders are to be shipped.

All remittances should be by postoffice money order, registered letter, express order or bank draft. All orders from foreign countries to be accompanied by draft or international money order.

#### ABOUT WEIGHTS AND SHIPPING.

The question of freight charges to distant points is a matter of serious consideration to such customers, and we are therefore submitting a few figures to give a clearer insight into the subject.

The general run of deciduous fruit trees, either in bales or cases, average about as follows: 6 to 8 feet, 2 pounds each; 4 to 6 feet, 1½ pounds each; 3 to 4 feet, 1 pound each; 2 to 3 feet, one-half of a pound each. Grape vines, one-third of a pound each.

Deciduous ornamental trees from 6 to 8 feet and up to 12 to 15 feet, 3 to 6 pounds each.

Potted plants in from 3 to 6 inch pots, packed in boxes, weigh from 4 to 12 pounds each.

Citrus trees, balled, packed in boxes, 40 pounds each, and with naked roots, 3 pounds each.

Palms, packed in boxes, with ball of earth, 2 to 3 foot plants, 40 pounds, and gradually increasing to 110 pounds each on 5 to 6 foot plants.

Grape cuttings 14 to 16 inches long, 80 pounds to the thousand cuttings, in either bales or boxes.

Eucalyptus, cypress, about 100 to the flat, 50 pounds per flat; hedge plants from 50 to 100 to the box, according to size, 50 pounds per flat.

#### APPROXIMATE PACKING CHARGES.

It is difficult to give these charges accurately, as they will vary more or less, according to the condition of the trees; however, the figures given are taken from our records of charges for the run of shipments for sizes specified: 6 to 8 foot trees in bales, \$2.00 per 1000; 4 to 6 foot trees, \$1.50 per 1000; 3 to 4 foot trees, \$1.25 per 1000; 6 to 8 foot trees completely boxed, \$5.00 per 1000; 4 to 6 foot trees, \$3.00 per 1000; 3 to 4 foot trees, \$2.50 per 1000.

Grape vines in bales, 50 cents per 1000 vines; in cases, completely boxed, \$2.00 per 1000 vines.

Deciduous ornamental trees, 6 to 8 feet and up to 12 to 15 feet, in bales, from 30 to 40 cents per 100, and completely boxed, 50 cents to \$1.00 per 100.

Potted plants in from 3 to 6 inch pots, from 1 to 5 cents each.

Citrus trees, balled, packed in boxes, tops protected with burlap, 7½ cents per tree (boxes hold from 10 to 12 trees); in cases, completely boxed 10 cents per tree; naked roots, packed in moss in boxes, tops burlaped, 1 cent per tree; completely boxed, 1½ cents per tree.

Palms, balled, in boxes, tops burlaped, from 5 to 20 cents per plant, according to size.

Grape cuttings packed in bales, 20 cents per 1000 cuttings, and in cases, completely boxed, 35 cents per 1000.

Eucalyptus, Cypress and hedge plants, tops covered with burlap, in flats, 15 cents per flat.

As has been previously stated, the weights and packing charges given are merely a general average, and this data is supplied for the purpose of placing our customers in position to figure out about what their stock will cost them delivered at destination. We desire to assure our patrons that we only charge for packing to cover the cost of material used.

#### FREIGHT CLASSIFICATION.

It may not be generally understood that the method of packing a shipment of trees or plants is the basis on which freight charges are made. Nursery stock in bales or boxes completely covered with tulle or burlap take the first-class rate, while in cases completely boxed the third-class rate applies. When trees are shipped without packing, the classification requires the payment of the double first-class rate.

In carload lots with a minimum of ten tons, class C applies, and this is as a rule from 50 to 75 per cent less than the first-class rate.

For local shipments in California, trees are either packed in bales, wrapped with tulle, or in boxes, tops protected with burlap, for the difference between the first and third class rates is so slight that nothing would be gained by boxing, for the increased cost would more than offset the saving in freight charges.

To distant points in Texas, Mexico, Colorado and to other States and countries outside of California, when stock is to be a long time in transit, it is packed in paper lined cases, not only with a view of having the trees carry better, but also because of the saving in freight charges, the difference in classification being in many cases \$1.00 per 100 pounds.

We have made a very close study of traffic conditions, and our knowledge is used to secure in all cases the very lowest freight rates for the benefit of our customers.

No accurate data can be given as to freight charges on orders for export, except that in a general way a shipment by water to Australia or Japan from San Francisco will cost about one-third less than it does from Fresno to San Francisco, a distance of 206 miles.

<b>CITRUS TREES—</b> All of our stock is grown in Exeter, along the foot-hills, the great thermal belt of Tulare county, by the Roeding & Wood Nursery Company. The trees are planted in a heavy, black loam, permitting the taking up of balled stock in first-class shape. No fertilizer is used and in consequence of this our trees, when the planting season arrives, are sturdy, well matured—are, in fact, perfect specimens. The iron in the soil gives the foliage a deep, lustrous green, healthy color, and this in itself makes the stock attractive to dealer and planter alike. Quotations named are for trees taken up with ball of earth, or with naked roots. Diameter measurements are taken one inch above the bud. Trees are branched at two feet from the ground and have fine, compact heads.

**GRAPES**—It is only natural that Fresno, the greatest grape growing section in California, should have a nursery correspondingly large devoted to grape culture. Cuttings of all the standard varieties of wine, raisin and table grapes are readily obtained. We are prepared to furnish cuttings in large quantities, providing parties place their orders with us prior to December 15. A large area of our nurseries is devoted to grape culture in order to meet the requirements of our customers from all parts of the Pacific Coast, and even far down into Mexico. Our trade in recent years has extended to some of the Eastern States, where the winters are not too severe. Our stock of vines on their own roots, Phylloxera Resistant roots and grafted on Phylloxera Resistant roots is very complete. Our vines are grown in the Kings River bottom, on new land, in loose alluvial soil, causing them to have a fine, vigorous root system.

The vines will be supplied as follows: 500 at the 1000 rate, where this rate is quoted, in not less than 50 of any one variety; 50 at the 100 rate, in not less than 10 of a variety. In small lots of one or two of a kind, the 10 rate will apply, except in quantities of less than five vines, when the single rate will be charged.

## ORNAMENTAL DEPARTMENT

### SPECIMEN DECIDUOUS TREES

To meet the demand for large specimen trees we have placed them in a class by themselves. These trees are carefully selected and are as a rule well furnished with lateral branches. They are grown in a deep alluvial silty soil and are therefore well provided with fibrous roots, so that very little difficulty will be encountered in transplanting them if given ordinary care. Before shipping we cut the trees back to proper height for planting.

	Inches in diam.	Height	Each	Per 10
<b>ALDER</b> —European .....	3 to 4	20 to 24 ft.	2.00

## PALMS, AGAVES, DRACAENAS, YUCCAS

Of all the plants grown in California and in other states and countries with climates similar to ours, none are more decorative or do more to give a tropical effect to our gardens and rural homes than the palms. For the home the smaller and more tender varieties do much to set off the interior decorations. There is such an endless variety of these striking plants that sorts for the smallest garden which do not grow higher than four feet, to those which attain a height of 100 feet, may be selected.

As will be noticed from the following list, we carry a large stock of palms in boxes and tubs. These have been taken out of the open ground and are well established in their containers. They can be used either for porch decoration or planted out in the open ground. Such plants give an immediate effect and never go back when transplanted. Hardy sorts are marked with an asterisk (\*).

## OUR FIELD-GROWN ROSES

Our roses are budded plants and field grown, in rich, loose, alluvial soil, which is conducive in giving them a fine, vigorous root system and heavy tops. Roses are tied in bundles of ten, and we will appreciate it if orders are made up as far as possible in multiples of this number. Plants will be supplied as follows: Fifty at the 100 rate, in not less than five of a variety. In small lots of one and two of a sort the ten rate will apply, except in quantities of less than five plants, when the single rate will be charged. The roses are arranged in alphabetical order; the abbreviations opposite each variety indicate the class to which it belongs. Standard or tree roses, fine strong heads, will be supplied as follows: Five at the ten rate, fifty at the 100 rate, in assortments at option of purchaser.

### ABBREVIATIONS.

Ban.—Banksia.  
Ben.—Bengal.  
Bour.—Bourbon.  
H. N.—Hybrid Noisette.  
H. P.—Hybrid Perpetual.  
H. T.—Hybrid Tea.  
Misc.—Miscellaneous.  
M.—Moss.  
N.—Noisette.  
Poly.—Polyantha.  
Pr.—Prairie.  
Rug.—Rugosa.  
T.—Tea.

### VERY RECENT INTRODUCTIONS.

Price, 40 cents each; \$3.50 per 10.

Lady Gay—Poly. Bright pure rose color.  
Rosalind Orr—H. T. Bright scarlet pink.  
Richmond—H. T. Bright scarlet crimson.  
Soleil d'Or—Misc. Gold to reddish gold.

### NEW AND SCARCE VARIETIES.

Price, 30 cents each; \$2.50 per 10; \$20.00 per 100.

Admiral Dewey—H. T. Carmine.  
Baby Rambler—Poly. Dwarf, ever-blooming crimson.  
Banksia Single—White.  
Climbing Bridesmaid—Tea. Bright pink.  
Climbing Kaiserin Augusta Victoria—H. T. White.  
Climbing Mme. Caroline Testout—H. T. Clear pink.  
Climbing Mlle. Cecile Brunner—Poly. Rosy pink.  
Climbing Meteor—H. T. Deep crimson.  
Climbing Paul Neyron or Mme. Wagram—H. T. Clear, bright pink.  
Climbing Wootton—H. T. Crimson.  
Enchantress—Tea. Cream white.  
Grass an Teplitz—Bour. Dark crimson.  
Helen Gould—H. P. Carmine.  
Ivory—T. Pure White.  
Jubilee—H. T. Fine red.  
Liberty—H. T. Fine crimson scarlet.  
Maman Cochet—T. Rosy pink.  
Marechal Niel—N. Deep sulphur yellow.  
Souvenir de President Carnot—H. T. Rosy flesh.  
White Maman Cochet—T. Pure white

### GENERAL COLLECTION OF STANDARD SORTS.

Price, 25 cents each; \$2.00 per 10; \$15.00 per 100; \$125.00 per 1000.

Abel Carriere—H. P. Purple crimson.  
Agrippina—Ben. Deep crimson.  
Alice Leroy—M. Pink.  
American Beauty—H. P. Rosy crimson.  
Anna Marie de Montravel—Poly. Pure white.  
Antoine Mouton—H. P. Rose.  
Augustine Guinoiseau or White La France—H. T. Pearly white.  
Baltimore Belle—Pr. Pale blush.  
Banksia White—Ban. White.  
Baroness Rothschild—H. P. Pale bright rose.  
Beauty of Europe—T. Deep yellow.  
Beauty of Stapleford—H. T. Bright pink.  
Belle Siebrecht—H. T. Imperial pink.  
Black Prince—H. P. Dark crimson.  
Bon Silene—T. Dark crimson.  
Bougere—T. Bronze pink.  
Bridesmaid—T. Clear bright pink.  
Camdens—T. China rose.  
Capt. Christy—H. P. Deep flesh.  
Cath. Mermet—T. Light flesh.  
Celine Forrestier—N. Sulphur yellow.  
Cherokee Single—Misc. Pure white.  
Cherokee Double—Misc. White.  
Cheshunt Hybrid—H. T. Cherry carmine.  
Christine de Neve—T. Deep pink.  
Claire Carnot—N. Coppery yellow.  
Climbing Capt. Christy—H. P. Deep flesh.  
Climbing Devoniensis—Tea. White, center blush.  
Climbing Hermosa—Bour. Light pink.  
Climbing La France—H. T. Pink.

## REQUISITES FOR ORCHARDISTS AND NURSERYMEN

### PRICES NET

**GRAFTING WAX**, ½ lb., 15c; 1 lb, 25c.

**RAFFIA**—Used for tying bench grafted vines. The most desirable and cheapest material known for tying plants. Very largely used by florists and nurserymen. Much cheaper than string, and more durable. Per pound, 15c: 10-pound lots, 12½ c per pound.

### TREE AND POT LABELS

	Per 1000
3½ inch Tree Labels, iron wire.....	\$1.00
3½ inch Tree Labels, copper wire.....	1.25
4 inch Pot Labels.....	.75
5 inch Pot Labels.....	1.00
6 inch Pot Labels.....	1.25

### TREE PROTECTORS

Our extreme long, hot and dry summers make it imperative for all fruit growers to shade the bodies of young trees the first season. A piece of burlap or common newspaper wrapped around the tree will answer the purpose, but the most efficient and valuable of all protectors is made from the Yucca Palm. It is easily put on, will outlast any other protector, and allows the air to circulate around the stem of the tree. We have used these protectors for years, and can recommend them very highly. Soak the bundles in water shortly before using.

	Weight per 100
30 inches long, 7 inches wide, \$17.50 per 1000.....	20 lbs.
24 inches long, 7 inches wide, \$15.00 per 1000.....	18 lbs.
18 inches long, 7 inches wide, \$12.50 per 1000.....	13 lbs.
16 inches long, 7 inches wide, \$12.00 per 1000.....	12 lbs.
14 inches long, 7 inches wide, \$10.00 per 1000.....	10 lbs.
12 inches long, 7 inches wide, \$9.00 per 1000.....	9 lbs.
10 inches long, 7 inches wide, \$8.00 per 1000.....	8 lbs.

### FRESNO PRUNING SHEAR

This shear has come into universal use in Fresno and in many of the larger vineyard and orchard districts. For vine and tree pruning there is no more serviceable tool made. It has given such general satisfaction, we do not hesitate to recommend it.

For light pruning or making cuttings, the small hand shear is to be preferred. The total length of the shear, including handles, is 26 inches.

The shear is made of the finest tempered steel, the jaws have a spread of 3½ inches, permitting the cutting of branches which would ordinarily have to be cut with a saw. The handles are made of ash, and the sockets are strengthened with a steel band. Shears can be supplied with shorter handles if desired.

Price, per pair.....\$2.50  
Actual weight per pair, 2¾ pounds.

### RIESER CORCELLES PRUNING SHEAR

This standard shear from which all hand shears are patterned is made in Switzerland. It is hand made, and the material is the very best. It will outlast any other shear made two to one, in the hands of a careful workman, even where subjected to the heaviest work. We have used it in our nurseries

for years for stubbing nursery stock, and have found it to be the only shear which would stand up to the work.

Price, per pair, 8½ or 9 inch.....\$4.00

Actual weight per pair, 1¼ pounds.

### AMERICAN CORCELLES SHEAR

For making hard wood cuttings, such as grape, fig, etc., this shear in the hands of the average workman has given us the very best of satisfaction. It

is strong and durable enough for ordinary work. It is patterned very much after the Rieser, having the double brass springs, which rarely break. It makes a clean cut and does not bruise the wood.

Price, per pair, 8½ or 9 inch.....\$2.25

Actual weight per pair, 1 pound.

### ROSE SHEAR

This shear is only adapted for light pruning and for cutting flowers. It is just the thing for ladies' use. It has a spiral spring and is nickel plated.

Price, per pair, 6 inches long.....\$1.25

Actual weight per pair, ¼ pound.
